

REMARKS

Applicants thank the Examiner for indicating that the present Application is in condition for allowance. In the paperwork accompanying the Notice of Allowability, the Examiner included an Examiner's amendment of the title of the Specification. The Applicants respectfully request that their proposed replacement title be used instead – thereby addressing the Examiner's concerns of providing a more extensive title, without including the limitation that the data is transmitted "at the time the option pack is coupled to the main unit". None of the allowed claims expressly or impliedly contain any such limitation, and using the title which the Examiner kindly proposed would unnecessarily confuse anyone trying to understand the subject matter encompassed by the present patent application. Thus, Applicants respectfully request that their amendment to the title be entered as embodying only a correction of a formal matter in the specification; such amendment does not change the scope of the claims. No new matter has been added by this amendment.

Applicant respectfully requests that the Examiner enter this amendment as strictly directed to a matter of formality, and pass this Application along to issue.

Respectfully submitted,

L. Joy Grisbenow  
Attorney for Applicant  
Registration No. 33,704
